Easy option to change delivery method here.

It is impossible to scroll down the list with added items in the current version of the shopping bag which is short. To click "View more" is only the option to see the list of all chosen product. The new proposal allows scroll and see all the information on **one** page.

It is easy to edit a shopping bag (edit amount of item, delete smth) without going to a special page clicking Change Order.

This option helps to cancel removal if a customer changed his/her mind or removed an item accidentally.

I combined the home delivery and the delivery method into one group, since they are related to each other.

It is possible to add delivery address using one of three options: finder (list of all streets), manually or on the map.
